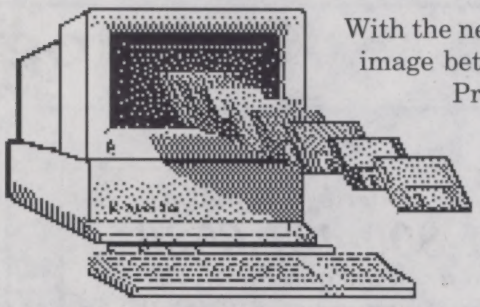
## The Graphic Exchange™ *New GS/OS Version!*



With the new Graphic Exchange, you can pass virtually any Apple II graphics image between different application programs. This means you can take a Print Shop graphic, and convert it to a Super Hi-Res image for use with Print Shop IIGS, PaintWorks, Deluxe Paint, 8/16 Paint, HyperStudio and others. You can take your favorite Newsroom art and use it in Dazzle Draw. Extract portions of any graphic screen and turn it into your own clip art. You can also do this in batch conversions (converting several graphics at one time) and even convert graphics to icon files!

One of the most exciting new features of The Graphic Exchange is the conversion capabilities from Super Hi-Res (or any other) screen to and from a MacPaint screen! MacPaint files can now be saved directly to a network file server volume, or saved on a GS/OS disk, and then move to the Mac with Apple File Exchange. Once on a Mac disk or the server, the converted graphics can be loaded directly into MacPaint. With the new batch mode, you can easily convert an entire group of MacPaint clip-art files to Super Hi-Res for use in AppleWorks GS or any other program. The Graphic Exchange can directly read Macintosh disks (400K, 800K, MFS or HFS), after which the image can be converted to any of the other formats. If you use Apple graphics, you can't afford to be without The Graphic Exchange!

The Graphic Exchange is shipped on a 3.5" disk, is not copy-protected, and is hard disk compatible. Also available is our new library disk for graphic formats such as GIF and Works of Art; see below for more details.

Apple IIGS, 1MB RAM
Regularly priced at $49.95

***Special Catalog Price: $35.00 !***

*The Graphic Exchange* ..... **RW-001**

## The Graphic Exchange™ Library Disk #1

**New!**

Expand your graphic conversion capabilities! This disk presents you with a comprehensive new set of graphic conversion tools—giving you many more options, and much more power, when working with Apple II graphics. Use these toolsets with The Graphic Exchange and you'll be able to convert: Springboard Publisher Works Of Art, Print Shop Borders, Print Shop IIGS Borders, 3200 color screens, many GIF formats, IBM pictures, and more!

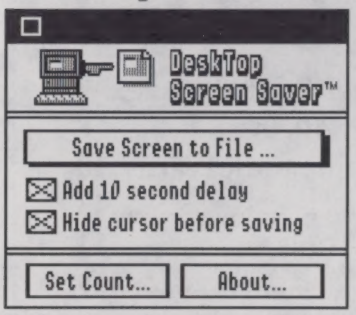
Requires The Graphic Exchange, sold separately
Regular Price: $29.95

***Special Catalog Price:***

*TGE Library Disk #1* .. **RW-002** ***$24.95 each!***

## Desk Accessories To Give You Extra Power

If you've wanted a way to **delete, rename, or even copy files** while in HyperStudio, here's the way to do it! **Desktop File Control** allows you to this and even more while inside of HyperStudio, AppleWorks GS, or any other desktop programs. You can lock or unlock files, move them to different directories, and view text files and even AppleWorks Classic word processing files!

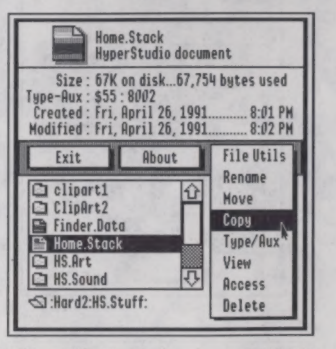


*Desktop Screen Saver* ..... **RW-004**

Regular Price: $24.95 each

**Desktop Screen Saver** is a handy utility which allows you to take a picture of the Super Hi-Res screen at any time, and put it on disk for later use. Screen shots allow you to use artwork from other programs (such as MECC World GeoGraph) in your own stacks!

***Special Catalog Price: $19.95 each!***



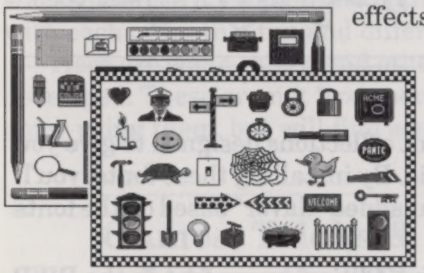
*Desktop File Control* ..... **RW-003**

# Roger Wagner Products

## HyperStudio Clip-Art Volumes 1 and 2

*Fantastic collections of clip-art to make any stack a stunner!*

**Volume One** has almost 600 clip-art images including subjects such as school, business, film, video, household, garden, and transportation. Volume One also has a "clip-animation" section with 27 animated objects, including a spinning earth, film projector, time bomb, fanciful machinery, and more! All of these can be used as animated buttons, or just special effects anywhere in your stacks.



**Volume Two** includes almost 500 clip-art images on topics such as animals, faces, buildings, nature, and rockets, plus more than 25 special background images. Each disk has several screens of just button images, and lots of nifty borders to brighten up any stack.

Regularly Priced at $24.95 each

***Special Catalog Price: $19.95 each!***

*Clip-Art Volume One* ..... **RW-005**

*Clip-Art Volume Two* ..... **RW-006**

***Each volume includes a visual directory of all the graphics on disk!***

### HyperArt On Tour...

Filmmaker Chris Marker is presenting a computer art and multimedia showcase. He began his show at the prestigious Pompidou Center in Paris, France, using HyperStudio to display the artwork he created with HyperStudio's built-in paint tools. After Paris, the show went on World Tour. It traveled from Barcelona, Spain, and then to Toronto, Canada. Chris' show arrived in the US in July 1991, at Columbus, Ohio. In December, 1991, the show will open in San Francisco and will conclude in Kawasaki, Japan in 1992.

## Clip Sounds Volume One

This two-disk set of HyperStudio sound effects will make a nice addition to your sound library. With more than 20 disk-based sound files, Clip Sounds allows you to add all new and interesting sounds to your stacks. Also included in this package are two Xcmds you can use in your stacks. The first Xcmd, **DiskPlay**, allows you to play virtually any size sound file without getting that awful "out of memory" message. DiskPlay reads the sound directly from disk while loading only small portions of the sound (16K) at a time. The second Xcmd, **ButtonPlay**, allows the assignment of one sound to as many different buttons as you wish, thus keeping your stack size to a minimum.

***Add new sounds such as : Bells, Phones, Musical Transitions, and more!***

Regular Price: $24.95; with source code: $49.95

***Special Catalog Price: $19.95***
***with Xcmd source code: $35.00***

Requires HyperStudio

*Clip Sounds Vol. One* ..... **RW-007**

*Clip Sounds w/source* ..... **RW-008**

## HyperStudio Xcmds Volume 1

This disk, created specifically for HyperStudio, is a set of special commands that extend the power of HyperStudio as a programming environment. Best of all, you don't have to be a programmer to use Xcmds (although you should at least be comfortable with how to copy a file to the same directory as your stack).

The package also includes **Master Xcmd**, which lets you put as many different Xcmds in one stack as you wish and call any sequence of combined Xcmds when a button is pressed. Other Xcmds included can control a CD player, find text, add multiple 320 screens to your stacks, and many other exciting functions.

Regular Price: $49.95; with source code: $100

***Special Catalog Price: $35.00***
***with Xcmd source code: $75.00***

Requires HyperStudio

*Xcmds Vol. One* ..... **RW-009**

*Xcmds w/source code* ..... **RW-010**

## HyperStudio Stack Sampler

**FREE** *with purchase of $20.00 or more in products!*

As a way of saying ***"Thank You!"***, we're offering this collection of HyperStudio stacks when you order twenty dollars or more in products from our catalog. This disk contains lots of nifty stacks written by HyperStudio users. We're sure you will enjoy browsing through this collection. Perhaps it'll spark some ideas for creating your own stacks!

## RWP Font Collections

Eric Mueller, one of HyperStudio's programmers, has assembled these font collections designed to give you many new options when graphically expressing yourself with HyperStudio. By installing these fonts, you'll have new choices in typestyles, and as a result, you can give your stacks that added "flavor" based on the fonts you choose.

Each collection contains a wide range of font families, styles and sizes. In addition, every font in the RWP font collections has the correct font ID number, as assigned by the A2-Central font clearinghouse, which guarantees you no font ID conflicts.

***Can also be used with any desktop-based programs that allow font selection, such as AppleWorks GS!***

***Price: $19.95 each!***

### Fancy Fonts

*Volume One*

Fonts of fancy, decorative, and unusual styles. Includes:

- Abbey Deco
- Baby Teeth
- Banner
- Cactus Deco
- Dallas
- Eire
- Fancy Caps
- Ham
- Infocom
- Kawasaki
- Palo Alto
- Pen and Ink
- Rangers
- and more!

*Fancy Fonts 1* ..... **RW-D01**

### Functional Fonts

*Volume One*

Fonts which have good display qualities. Includes:

- Aqua Mundo
- Barrington
- Calgary
- Deerfield
- Easy Street
- IBM
- Kalona
- Kappa Bold
- Palantino
- Rochelle
- Saigon
- San Diego
- Seattle
- and more!

*Functional Fonts 1* ..... **RW-F01**

### Functional Fonts

*Volume Two*

Even more fonts with good display qualities. Includes:

- Bodoni Ultra
- Boise
- Bold 1
- Boston
- Brennero
- Edmonton
- Grafik
- Gratitude
- Madison
- New York
- Tiffany
- Union
- Wash. D.C.
- and more!

*Functional Fonts 2* ..... **RW-F02**

## MacroMate

MacroMate is a keyboard macro program that lets you assign an almost limitless amount of text and/or program keyboard commands to a single key. For example, set up a command key, like Option-L, to automatically run your favorite word processor, load an existing document, and type in your letterhead! Quickly define a long word or phrase (up to 10,000 characters), such as your company name, or an unusual technical term, and then have the computer automatically type the entire phrase for you with a single command key. Disabled computer users, or anyone who just hates typing, can create single-key commands to perform virtually any function, or type any amount of text, in a program.

Macros can be defined in an easy-to-use "record mode," or with the powerful built-in editor. Both the record mode and editor are always available, no matter what program you're running. MacroMate is a classic desk accessory (CDA), which is automatically installed whenever you start up any GS/OS disk!

*MacroMate works with programs written in virtually any environment: GS/OS, ProDOS 8, DOS 3.3, Pascal, even many copy-protected programs.*

Apple IIGS only
(768K RAM)
Regularly $49.95

***Special Catalog Price: $35.00 !***

*MacroMate* ..... **RW-011**

# Author Profile

## Paul Raymer

This edition of *Author Profile* highlights **Paul Raymer**. Paul has a unique purpose for using HyperStudio and the Apple IIGS. Wanting to keep in touch with his grandson who lives several hundred miles away, Paul bought himself and his grandson each an Apple IIGS and HyperStudio. The two now enjoy sending each other "HyperLetters" in the form of HyperStudio stacks.

Paul is not a professional computer programmer, but he does enjoy creating stacks because it's something both he and his grandson can do to communicate with each other in a fun and different way.

Here are some games and other fun and interesting things that Paul has developed. These are not "commercial" stacks, yet we're sure you will not only enjoy using them, but will find some interesting and unique ideas.

Thanks, Paul, for your help and support! From The RWP Gang

### Games, Tricks & Other Interesting Things

This group of stacks shows interesting (and unique) techniques for creating simple games in HyperStudio.

• **The Boys:** Three lively characters share their heads, bodies and legs as you create different combinations of each. • **Counting Money:** Click on quarters, dimes, nickels and pennies to count to 50 cents. • **Sixteen Candles:** Can you beat HyperStudio by blowing out the last candle? See how you can actually play games against the computer! • **The Seer:** Remember the "eight-ball" that answered all your questions? In a similar vein, *The Seer* will answer all of your queries!

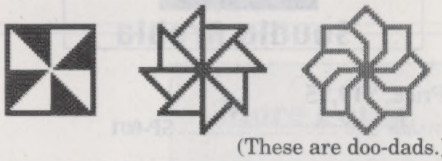
Price: **$14.95**

*Games & Tricks* ..... **PR-001**

### Arrows, Flags, Doo-dads, and Other Clip-Art

• **Paul's Clip-Art Collection:** Lots of nifty clip-art images for use as buttons, icons, or whatever you may need clip-art for. Contains arrows, boxes, doo-dads, borders, and samples of how you can use them in a stack.

• **Signal Flags:** Clip-art of nautical flags. Includes Alphabet, Numerals, Navy, Pennants and Subs. Comes with a stack containing all the flags for easy browsing, nine picture files and a sample stack of how they could be used. *Contains over 60 different flags!*



(These are doo-dads.)

Price: **$14.95**

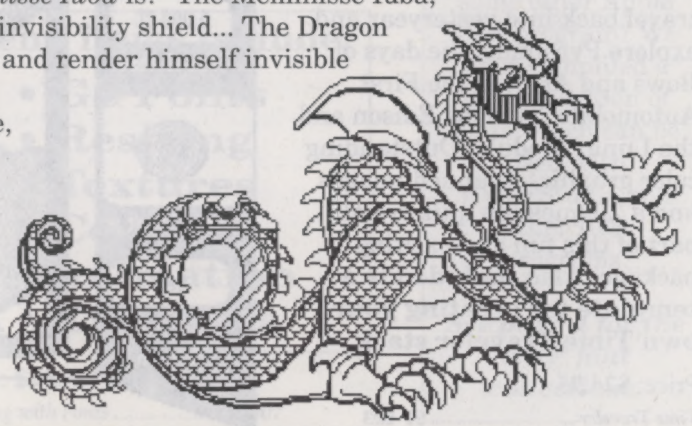
*Doo-dads and Flags* ..... **PR-002**

### Dragons & Fairy Tales....

• **Dragon Parts:** Do you know what a *Meminisse Iuba* is? "The Meminisse Iuba, or Long Mane of the Dragon, was its cloak of invisibility shield... The Dragon would flap his Meminisse Iuba about himself and render himself invisible to his opponent." Find out this and more!

• **Fairy Tales:** Goldilocks, Hansel and Gretle, and Little Red Riding Hood all meet in this interwoven fairy tale/adventure.

• **Where are the Dinosaurs:** A truly interactive hypermedia story. This stack demonstrates how to connect words and thoughts together in a cute little story.



Price: **$14.95**

*Dragons* ..... **PR-003**

# SpotLight Products from HyperStudio Network

## HyperStudio Network

HyperStudio Network (HSN) is an organization dedicated to the promotion of hypermedia. Offering a membership at reasonable prices, HSN provides its members with a bi-monthly newsletter containing up-to-date information and "how-to" advice for HyperStudio users. We are pleased to offer in our catalog their line of StudioWare, called "SpotLight Products."

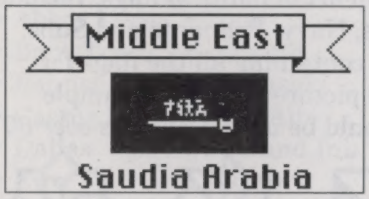
For more information regarding HyperStudio Network, you can contact them by writing to:

**HyperStudio Network**
**Box 103**
**Blawenburg, NJ 08504**

## Middle East Stacks

*by* Jan K. France

*Middle East Stacks* provides lots of information about the geography, conflicts and history of the Middle Eastern countries. Included are detailed descriptions of the regions, a picture of each country's flag and a list of discussion questions.



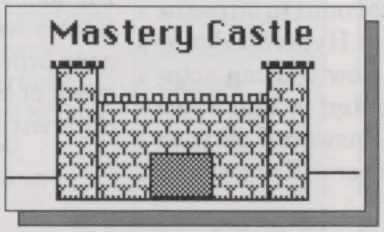
Price: **$19.95**

*Middle East* ..... **SP-001**

## Mastery Castle

*by* Darrell Anderson

This educational-adventure game provides a fun way to test students' knowledge! Students begin a journey through Mastery Castle and the success of their journey depends on how well they answer the questions on a 20 problem test. This creative and flexible stack allows you to **create your own 20 problem test** using a key that comes with the package. Outstanding graphics and fun surprises make taking tests lots of fun!



***Add fun to tests with Mastery Castle!***

Price: **$24.95**

*Mastery Castle* ..... **SP-002**

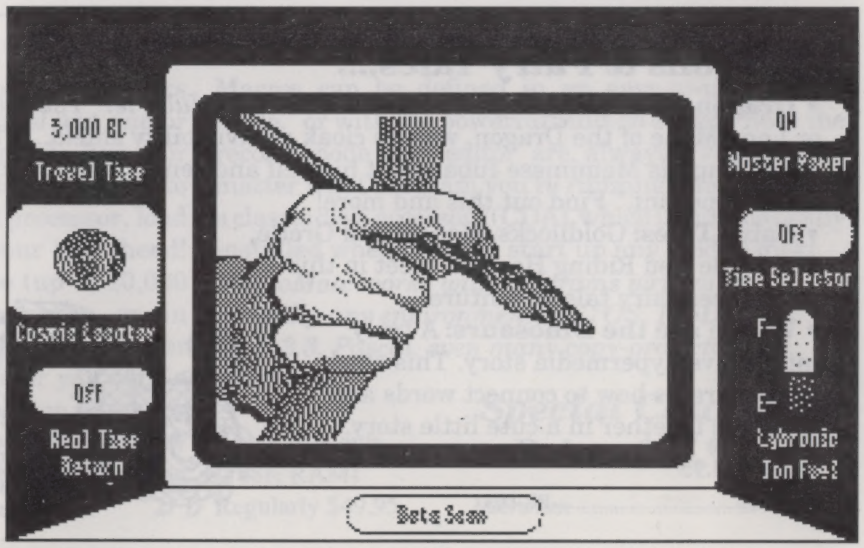
## Time Traveler

*by* Stephen Winding

Use this time machine stack to travel back into yesteryear and explore Pyramids, the days of Bows and Arrows, the First Automobile, Thomas Edison and the Lunar Module. Outstanding color graphics, scanned images and a 20 question quiz are all part of this fun and exciting package. **Also included is a template for creating your own Time Traveler stack.**

Price: **$24.95**

*Time Traveler* ..... **SP-003**



# SpotLight Products from HyperStudio Network

***Geography Stacks for today's Classroom***

**Samples and Templates!**
Karl Ivers has written these three stacks dedicated to geography. Each contain sample stacks and templates. Students can easily create their own reports using the already established frameworks! *Each stack is sold separately.*

## World Geography

World Geography contains several maps displaying the continents of the world. Individual countries can be selected, accessing other stacks containing information relating to a country's history, customs, flag, government, famous people and more. Includes one sample stack (Poland) and a template, which can be used to create your own stacks on other countries.

Price: **$24.95**

*World Geography* ..... **SP-004**

***World Geography***

## U.S. Geography

U.S. Geography contains a map of the U.S., divided into regions of 8 to 12 states. Individual states can be selected, thus accessing other stacks which contain information relating to the state's history, flag, bird, motto, people and much more. One sample stack (Kansas) is provided. A template is also included which can be used to create your own state stack.

Price: **$24.95**

*U.S. Geography* ..... **SP-005**

***U.S. Geography***

## New Jersey Stack

A great supplement to the U.S. Geography stack! The New Jersey Stack contains information about New Jersey's history, flag, government, motto, state flower, state bird, famous Jerseyians and important statistics. Also includes several stacks (created by students) covering a variety of New Jersey-related topics. A good start to any report!

Price: **$19.95**

*New Jersey Stack* ..... **SP-006**

***New Jersey Stack***

## Fussing With Fonts *by* Jean Morgan

*If you've been searching for a new way to spice up your stacks, this great tutorial stack is for you!*

*Fussing With Fonts* takes a look at Apple IIGS fonts and shows new techniques on how to effectively use them in your stacks. You'll discover how to add color and textures to your fonts, animate words, resize fonts, and more! Comes complete with examples and how-to instructions. Included on this three-disk set are fonts used in the tutorial.

**Menu items include:**

- **GS Fonts**
- **Resizing**
- **Textures**
- **Color**
- **Animation**
- **Examples**

Price: **$24.95**

*Fussing with Fonts* ..... **SP-007**

### More Fonts

Have you wished you had more fonts while working in HyperStudio or some other Apple IIGS program? We have compliled a large selection of fonts which can be used with HyperStudio and other IIGS programs.

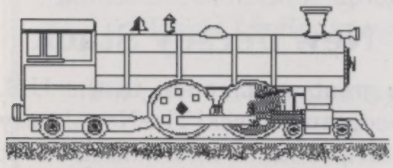
***See page 4 for the RWP font collections.***

# SpotLight Products from HyperStudio Network

## Steam Engine

*by* Karl Ivers

Explore the mysteries of steam with colorful graphics and outstanding animation. Steam Engine provides



a safe way for students to take a close look at steam and its effects on objects. A great addition to any science course or project.

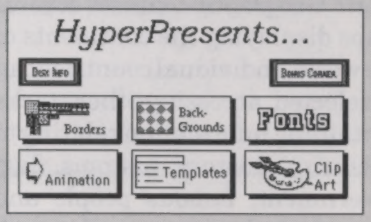
Price: **$19.95**

*Steam Engine* ..... **SP-008**

## HyperPresentations

*by* Jim Hirsch

HyperPresentations is a collection of ideas and resources for the production of HyperStudio stacks. Six areas are covered: **Borders, Backgrounds, Fonts, Animation, Templates** and **Clip Art**, and includes a library of examples and instructions on each of these elements. If you've been looking for ways to expand your stack creation talents, this is a perfect resource.

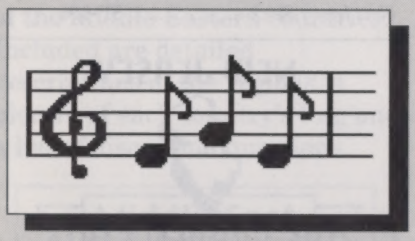


Price: **$24.95**

*HyperPresentations* ..... **SP-009**

## Meet the Staff

*by* Karl Ivers

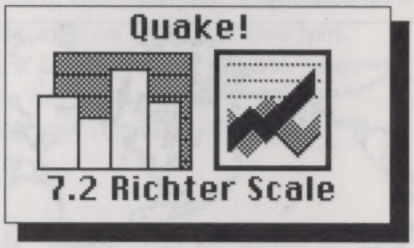


A music teacher's delight! Elementary school students are introduced to the staff, lines, spaces, notes, and more with this introduction to music stack.

Price: **$24.95**

*Meet the Staff* ..... **SP-010**

## Quake! *by* Jan K. France



Do you know what to do in the event of an earthquake? Have you the need to learn more about earthquakes? What role does the seismologist play in the study of these natural disasters? The answers to all of these questions and many more can be found in "Quake!"

*Detailed text, graphics, animation and sound are all a part of this science resource stack.*

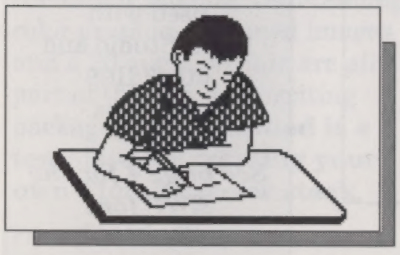
Price: **$24.95**

*Quake!* ..... **SP-011**

## Word Processing Learning Stacks

*by* Jim Hirsch

Two tutorial stacks explore the popular AppleWorks GS™ program by Claris Corporation. The first is a complete overview of AppleWorks GS modules. The second stack is a tutorial guide for using its word processing component. Also included is Key Caps, a stack which demonstrates how interesting characters can be generated using the right combination of keystrokes.



*Perfect for teaching this popular program to students!*

Price: **$19.95**

*HS Learning Stacks* ..... **SP-012**

## HyperSounds 1&2

HSN has compiled these collections of HyperStudio sound files for use in your stacks. Volume 1 includes more than three dozen sounds including instruments, special effects, voices, and more. Volume 2 includes over two dozen sounds: beeps, winds, sitar, jack-hammer and more.

Price: **$19.95** each

*HyperSounds 1* ..... **SP-013**

*HyperSounds 2* ..... **SP-014**

# Triad Venture Products

***Great HyperStudio Add-Ons!***

## • Clip Tunes

Include MIDI Synth created stereo music in your stacks! Package contains a Song Library with lots of pre-recorded MIDI Synth songs, an Xcmd song player, a sample stack and MIDI Synth Tool 35. MIDI Synth songs allow the Apple IIGS to play music just like expensive keyboards right within HyperStudio. The added bonus is that MIDI Synth files are much smaller than regular HyperStudio digitized sound files, taking less disk space, and can usually play for much longer periods of time than equivalent-sized digitized sound files.

## • ClipArt Plus

Includes 20 screens of finely detailed and colorful clip art which can be easily imported into your HyperStudio stacks. This disk also contains four New Desk Accessories: ClipIt, PrintSHR, Icon Button and Instant Icon.

## • Graphic Disk Labeler

Add that "professional" look to your 3.5" disks by printing labels created with Graphic Disk Labeler. Allows the use of Print Shop pictures and other IIGS picture files. Plus you can use any standard IIGS font for your lettering! You can also use Graphic Disk Labeler for labeling just about anything you may want to identify such as VCR tapes, canned foods or... you name it!

# Public Domain StudioWare

Over the last couple of years, we have collected over 250 megabytes of Public Domain stacks. HyperStudio, as you may have already discovered, is an outstanding way to express your thoughts, ideas and information. Unfortunately, there's not always an easy way to share your work with others. Many people across the nation are using electronic bulletin boards, such as America Online™, GEnie™ and CompuServe™, to make their HyperStudio stacks and accessories available to the outside world. We have found, however, that not all HyperStudio users have access to such services.

Generally speaking, Public Domain stacks are not commercial quality products (although there are some outstanding Public Domain creations included in our listings). Nonetheless, **Public Domain stacks are a great way to gather new ideas, add new clip-art and clip sounds to your library, and, most importantly, exchange ideas with others in an affordable way**. Because Public Domain is generally not copyrighted, you are free to use, alter, add to, copy, and give away Public Domain stacks for others to use as well. We do not guarantee their quality and have not taken any steps to improve them. They are distributed as we received them.

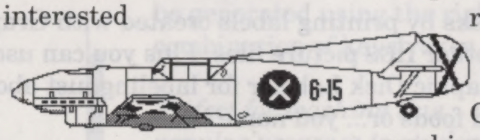
ShareWare stacks are much like Public Domain stacks, except that it's usually copyrighted and the author is requesting a small fee for its use. Typically, ShareWare stacks are nicer than Public Domain stacks, but not necessarily of a commercial quality. We have included in our collection a number of ShareWare stacks. Because we do not want you to have to pay for something twice, we have made a special arrangement with the ShareWare authors and **have paid your ShareWare fee for you (we call it PaidWare)**! You are still free to pass these stacks to others, include them in your user group library, or upload them to your favorite bulletin board.

We hope you will not only enjoy using Public Domain and ShareWare stacks, but will **send us some of your own work** for consideration of inclusion into our catalog as well. The exchange of information is very powerful and we are pleased to provide a means by which all can share with each other.

## Classic Aircraft : Volume I

*by Rock Rozak*

Explore classic aircraft of yesteryear. Classic Aircraft, Volume I provides a detailed study on the Messerschmit BF-109 in four categories: Variants, Markings, Heralding, and The G-6. This is a comprehensive look at these classic flying machines. Contains lots of details and outstanding graphics. A must for aircraft enthusiasts, or anyone interested in aviation.



***Featured in inCider/A+ Magazine***
May 1991

## Classic Aircraft : Volume II

The quest continues with this second addition to the Classic Aircraft series. Volume II explores the North American P-51 Mustang. Major subject areas covered are: Eighth AF Mustangs, Mustang Variants, ID Markings, and Detail Descriptions. This volume is filled with lots of information, complete with outstanding graphics and well-researched documentation. Explore the NA-73X Prototype, P-51 Mustang IA, F-82 Twin Mustang, and much more! Graphics and text explain the identification markings for the British, US Camouflage, US Bare Metal and Invasion markings of the P-51.

Price: **$15.00** *for both stacks!*

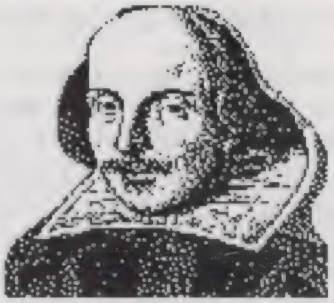
*Classic Aircraft 1&2* ..... **SW-001** *ShareWare*

# Public Domain StudioWare

## Shakespeare: Sonnet 55

*by* Eric Branscomb

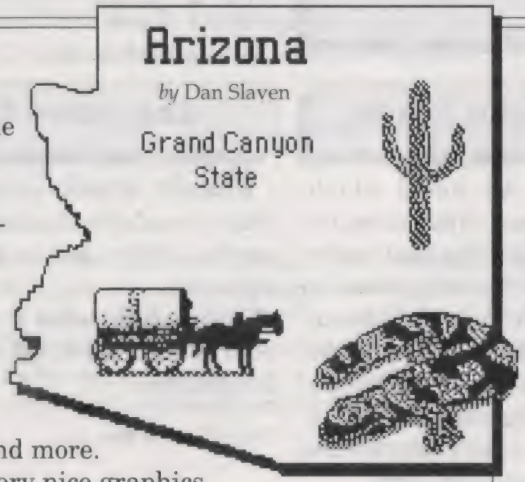
Shakespeare goes hyper! One of Shakespeare's most noted works, *Sonnet 55,* is presented in this very nice stack. Not only can you ***read*** the Sonnet, you will also ***hear it*** as the author of this stack reads to you line by line. A good introduction to the works of Shakespeare!



***Great Literature!***

Price: **$15.00**

*Sonnet 55* ..... **SW-002** *ShareWare*



Take a journey through the wild west with this tour of Arizona. Visit historical sights, beautiful scenery, native reptiles, and more. Includes very nice graphics, including some of the author's very own photographs. *Arizona* was designed to introduce children to this fascinating state. You can use this stack as a sample for creating your own state report, or as a good start to a United States geography stack.

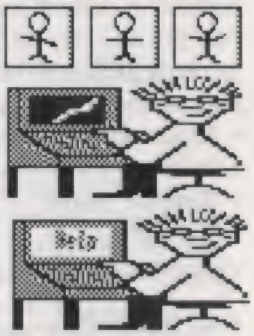
Price: **$15.00**

*Arizona* ..... **SW-003** *ShareWare*

## Animated Buttons

*by* Jean Morgan

Add spice to your stacks with buttons that come alive with animation! *Animated Buttons* is a step by step tutorial on how to effectively add interesting buttons to your stacks. But it doesn't end there! *Animated Buttons* also contains a lot of "clip animations" which are easily added directly to your own stacks. You'll have a great time using the resources found in this great stack.



***Bouncing arrows, dancing dingbats, fancy figures, and corny characters are all a part of this fun-filled package!***

Price: **$15.00**

*Animated Buttons* ..... **SW-004** *ShareWare*

## HyperMenu

*by* Tony Bounds, HyperVisions

HyperMenu is an exciting electronic cookbook where you can add all of your favorite recipes. Menu items include breads, desserts, beverages, and more. Comes complete with a manual explaining how to add recipes and even print out a shopping list! This stack is easy to use and has lots of nice options. You can even exhange recipes with others who use HyperMenu.

Price: **$15.00**

*HyperMenu* ..... **SW-005** *ShareWare*

**Help!**
If you need help using any of our products, our technical support department is waiting for your call. We are available from 9:30 am to 5:30 pm Pacific Time, Monday through Friday. You can reach us at (619) 442-0522.

# Public Domain StudioWare

## Public Domain FreeWare...

This page consists of stacks which are Public Domain FreeWare, which means the author of the stack is not asking any payment for its use. Since these are public domain, and generally do not carry a copyright notice, they can be expanded upon and altered as you wish. Public Domain is useful for obtaining ideas and sometimes even nice clip-art for your own projects. Keep in mind these are not commercial-quality stacks and we're offering them just as we received them.

## Fun and Games

• **What in the World?:** Fun for children (and adults too!). Four stacks, each containing several brain teasing picture puzzles. Try to guess what the puzzle's picture is before you get to the last frame!

• **Reach for the Smile:** A fun and educational game for early readers.

• **Remote Maze:** A little game of maneuvering two circles until they plop into their correct placeholders.

Order No. **PD-002** ..... **$7.50**

## Math & Science

• **Chemistry Reference:** This high-quality stack searches the Periodic Table with the click of the mouse by quickly scanning a data base text field.

• **Mandelbrot Mini-Stack:** A study in the images and description of the Mandelbrot set.

• **Sierpinski Gasket:** A look at fractals, how they are created and some of the visual results.

• **Coloring Maps:** Do you know how many colors are required to color a map? This small tutorial will give you an insight on how experts determine what colors to use when creating maps. Acquired skills include map skills and math skills.

Order No. **PD-005** ..... **$7.50**

## HyperStudio Xcmds

• **Scan Xcmd**: An Xcmd which automatically "scans" all the buttons on a given card, highlighting each button sequentially. If a "switch" device is clicked while a button is highlighted, that button is chosen regardless of the current mouse position. The switch device need only be something like a key-press, mouse click or other device used by disabled computer users.

• **Scroll Xcmd**: An Xcmd which automatically scrolls any given text item. For example, this can be used to scroll credits at the end of a stack.

Order No. **PD-003** ..... **$7.50**

## History

• **Sounds of History:** A collection of historical sounds complemented by brief descriptions of famous events and persons. Each sound file is located on disk, so you can use them in your own stacks!

• **American History:** An historical atlas of the United States. See the evolution of the U.S. map and flag.

• **U.S. Constitution:** Read the United States Constitution and the Amendments in this small stack.

Order No. **PD-006** ..... **$7.50**

## Soundsmith Xcmd

• **Soundsmith Player Xcmd:** With this HyperStudio Xcmd you can enjoy the songs created by Soundsmith, a song creation program, right within your stacks. Soundsmith songs are extremely nice sounding and take very little space on your disk. This disk includes the Xcmd, a sample stack and a variety of Soundsmith songs.

Order No. **PD-001** ..... **$7.50**

## Language Arts

• **Hamlet:** A nice presentation of Shakespeare's Hamlet. Its outstanding graphic design makes this stack a joy to use.

• **Communication Stack:** An informational stack on literature, composition and grammar.

Order No. **PD-004** ..... **$7.50**

## Geography

• **Brooklyn:** Visit America's fourth largest city, Brooklyn. This hyper-tour highlights some of the more interesting aspects of Brooklyn.

• **Middle East Countries:** A nice stack by 6th grader, Mark Daughenbough. This was his social studies project on middle eastern countries. A good example of what a 6th grader can do using HyperStudio!

• **European Countries:** A collection of stacks on European countries. Can be used as an outline for your own project.

• **Maps of Europe:** These outline maps of European countries can be used as clip-art or backgrounds for creating a stack on Europe.

Order No. **PD-007** ..... **$7.50**

**Opportunity Knocks...**

Say, have you created a stack that you're proud of? We would love to see it! We'll give it close consideration for inclusion in our next catalog! Send your stack(s) to **RWP, 1050 Pioneer Way, Suite P, El Cajon, CA 92020.**

# Videodiscs

## The Voyager Company

*Producers of interactive videodiscs*

### Dream Machine I and II

*An Anthology of Computer Graphics*

Celebrate one of the most profound developments in the history of communication—the computer's ascent as a visual instrument—with these dazzling state-of-the-art computer-generated sequences featuring the world's leading designers and production houses. Presented in two volumes, *Dream Machine I: The Visual Computer* and *Dream Machine II: Computer Dreams* survey the entire range of computer graphics techniques and applications ranging from computer-aided design, space exploration, and entertainment through architectural, medical, weather and flight simulations.

*$49.95 each volume*

*Dream Machine I* ..... **VG-001**
*Dream Machine II* ..... **VG-002**

### National Gallery of Art

*Visit America's National Museum*

Enjoy the glory of the National Gallery of Art located in Washington, D.C. More than 1600 masterpieces, paintings, drawings, sculptures and prints by such artists as Leonardo da Vinci, Rembrandt, Rubens, El Greco, Renoir, Matisse and Monet are presented on this videodisc in full-color images. A guided tour by the museum's director, a printed catalog and on-screen identifying captions for each work are included.

*$99.95*

*National Gallery of Art* ..... **VG-004**

### The Louvre

*Treasured Museum, Treasured Masterpieces*

Visit one of the world's greatest collections—unparalleled in its broad range and quality—via this superb reproduction of artworks from the Louvre Museum in Paris. Produced under the direction of the museum's curators, the Louvre series is distinguished by its exquisite detail and rich color. More than 5,000 works of art and 35,000 detailed images, with video commentary in French and English on selected masterpieces, are contained in this classic 3-volume set.

*$99.95 each volume*

**Volume I** - *Painting and Drawings*
Features 2,500 European paintings and drawings from the late Gothic period to the mid-19th century.
**Volume II** - *Sculpture and Objects d'Art*
Includes 970 examples of European sculpture and objects d'art.
**Volume III** - *Antiquities*
Explores ancient art and artifacts from Greece, Rome, Egypt, and the Near and Middle East.

*Volume I* ..... **VG-005**
*Volume II* ..... **VG-006**
*Volume III* ..... **VG-007**

### The Great Quake of '89

*An ABC News Interactive Report*

On Tuesday, October 17, 1989 at 5:04 P.M., a devastating earthquake struck the San Francisco Bay area. ABC News has taken the highlights of their coverage and added new material to create this first ever "Interactive Special Report." News anchor Diane Sawyer guides you through the moment the quake struck, World Series coverage, home videos of the quake, and a look back at the historic 1906 San Francisco earthquake. The Great Quake of '89 is replete with helpful tips on earthquake preparation and survival.

*$49.95*

*Great Quake of '89* ..... **VG-003**

### Regard For the Planet

*A Photgraphic Archive*
*by Marc Garanger*

Take a visual journey to distant cultures and continents though the eyes of pre-eminent French photographer Marc Garanger. Travel from the wilds of the Grand Canyon to bustling Shanghai, from the zoo to the Paris Stock Exchange, from kayaking to street riots. For over 30 years Garanger traveled the world on assignment, amassing a breathtaking archive of over one million images. Over 50,000 of his favorites have been assembled to create the world's largest visual database, and the first videodisc devoted to the work of a single major photographer. Includes music and a translated audio interview with Garanger.

*$75.00*

*Regard For The Planet* ..... **VG-008**

### Benefits of Videodiscs in Multimedia Presentations

For interactive multimedia, the videodisc emerges as one of the best means to provide information in a variety of forms due to its ability to easily hold sound, still pictures, motion pictures and text, all in one medium.

The videodisc also has the ability to access information in an almost seamless random fashion. Film, video cassettes and audio recordings present information in a "linear" fashion. With such medium, you have very little control over how, when, and in what order the information is presented.

With videodiscs, you gain control over the medium, choosing which sequences to view, which sounds to hear, which text to read, all in the order that you desire. Since videodisc players have the ability to randomly select different portions of the videodisc, obtaining the desired information takes only a matter of seconds.

# Multimedia Tools

## Apple Video Overlay Card

Now you can view real-time video images right on the computer screen from virtually any video source such as Laserdisc players, VCR's and video cameras. Better yet, you can actually MIX both the video image and the computer graphics to show both at the same time!

***What are the benefits? Here are just a few:***

- **No need to buy an additional TV monitor to view video sequences. By using the IIGS monitor, you save $$.**
- **Students using HyperStudio can interact directly with the video sequences and without having to view two different monitors.**
- **Special Effects... with a little practice, you can make stunning effects by mixing computer graphics with video sequences.**

Suggested Retail: $549.00

***Special Catalog Price:* $419.95**

*Apple Video Overlay Card* ..... **HW-011**

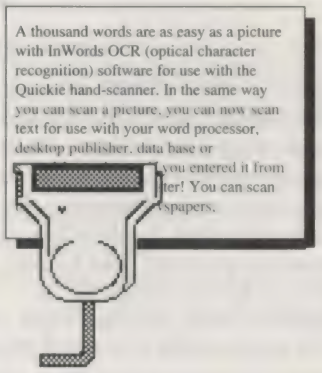
**Laserdisc Shopping?**

If you've been thinking about purchasing a laserdisc, but aren't sure which one to buy, we highly recommend *The Dream Machine* by Voyager. Roger uses this videodisc when demonstrating HyperStudio at conferences and shows. Because of its bright and colorful video sequences, *The Dream Machine* really shows off the ability of the Apple Video Overlay Card.

For more information on *The Dream Machine*, see page 13.

## InWords

A thousand words are as easy as a picture with InWords OCR (optical character recognition) software for use with the Quickie hand-scanner. In the same way you can scan a picture, you can now scan text for use with your word processor, desktop publisher, data base or spreadsheet, just as if you entered it from the keyboard, only faster! You can scan books, magazines, newspapers, typewritten pages, even pages wider than the scanner itself, and InWords will convert the characters into a usuable text file! InWords is fast and accurate: reading up to 3,000 characters per minute (become the fastest typist on the block!). So, why type when you can scan?



A thousand words are as easy as a picture with InWords OCR (optical character recognition) software for use with the Quickie hand-scanner. In the same way you can scan a picture, you can now scan text for use with your word processor, desktop publisher, data base or

Suggested Retail: $129.00 ***Special Catalog Price:* $89.95**

*InWords requires Quickie Hand-Scanner*
*InWords* ..... **HW-012**

**Handy Tip!**

**Using InWords to import text into HyperStudio is very easy!** Here's how to do it:

Let's suppose you wanted to use a newspaper article in your stack. Use the Quickie hand-scanner and InWords OCR software to scan the newspaper article. InWords will convert the words on the paper into an ASCII text file and you will save this file to disk. For this example, let's say you named the file "News.Text".

Once the file is saved to disk, start up HyperStudio. Select "Add a Text Field" from the "Objects" menu. Tell HyperStudio that you want to "Get File From Disk". Select the file "News.Text" (or whatever you saved it as) and HyperStudio places the text from the newspaper right into your stack. That's it!

*As a bonus, before starting HyperStudio and while you still have your Quickie in hand, you could scan any pictures associated with the article for use in your stack!*

## Pioneer LDV-2200 LaserVision Player

Suggested Retail: $895.00

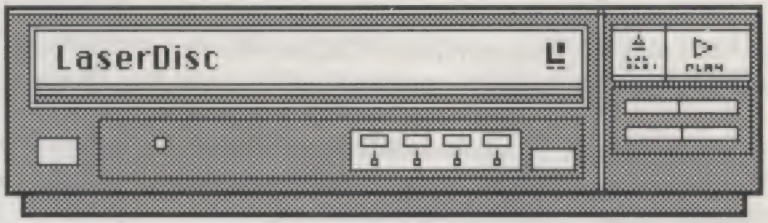
***Special Catalog Price:*** **$749.00**

*LaserVision LDV-2200 Player* ..... **HW-001**

*CC-04 Cable (for Apple IIGS)* **$19.95** ..... **HW-002**

***The right choice...***

For outstanding interactive video with the Apple IIGS, **the LDV-2200 is the right choice.** It can be used in conjunction with HyperStudio and the Apple Video Overlay Card™ (although it's not required), and you can add real-time video sequences right on the computer screen. Works great with both CAV and CLV video formats. The LDV-2200 is easy to use and easy to connect! *Requires CC-04 cable (sold separately) for use with the Apple IIGS.*



- **Laser Barcode compatibility**
- **Enlarged wireless remote**
- **Full Screen text overlay**
- **Used with TVs & Monitors**
- **Max search time approx. 5 seconds**

**Success Story!**

**Teacher Naomi Gross** wanted to teach her students the local history of their city in the state of New York, so she decided that HyperStudio, with an interactive videodisc, would be the ideal means to make the history lesson come alive. With video camera in hand, Naomi went out and shot footage of museums, buildings, and other local places of interest. She then had her video tape converted to video disk. Her students were able to not only write about their city's history, but view it as well. The history lesson went so well that her class has already completed a second project using video footage of their own school.

## The Quickie Hand Scanner by Vitesse

With the Quickie hand scanner you can quickly and easily turn photographs, line art, cartoons, drawings, or anything on paper into instant clip-art which can then be added to HyperStudio, AppleWorks GS, or any Apple IIGS program which allows importing of computer graphics!

- 400/300/200/100 switchable DPI (Dots per inch)
- Four encoding modes: Black and White for line images and three half-tones for photographs
- 16-step gray scale
- Real-time display shows image as you scan
- Built-in scanner view window
- Double rollers for accurate alignment
- Comes complete with hardware and software

Suggested Retail: $299.00

***Special Catalog Price:*** **$219.95**

*Quickie* ..... **HW-003**

**Success Story!**

**When teacher Jim Hirsch** was preparing for his school's open house, he decided a directory for parents would be a nice thing to have. Having taken a picture of each teacher, Jim scanned their photos with the Quickie hand scanner and imported them into HyperStudio to create a "visual" directory. He also was able to use the school's logo without having to draw it by hand! Parents were able to "click" their way around school & see their children's teachers even before they met them!

# Multimedia Tools

## ComputerEyes

by Digital Vision

Digital Vision's ComputerEyes lets you easily capture high-quality images into your computer system from any standard video source. Whether you are using a video camera, camcorder, VCR, or laserdisc player, ComputerEyes will allow you to easily capture the image to your disk.

A touch of a mouse or single keystroke is all that is required to digitize images and store them on your computer for use with desktop publishing, presentations, or multimedia programs such as HyperStudio.

*Includes all connecting hardware, cables and software necessary to allow you to professionally and economically capture images from any standard video source.*

Suggested Retail: $249.95

***Special Catalog Price: $209.95***

*ComputerEyes* ..... **HW-004**

**Handy Tip!**

**Capturing Images...**

Hand scanners are great for digitizing images from clip-art, photographs, newspapers, and other forms of printed material. But what do you do if you want a digitized picture of the students in your classroom? You could take a picture of them and wait for a week or longer for the pictures to get back and then scan them. Or, you could lay all the students on the floor and try to scan them, but usually they're just too bumpy for the hand-scanner to work well in such a case. Wouldn't it be nice to just point a video camera at your students and digitize them that way? That's where *ComputerEyes* from Digital Vision comes in! *ComputerEyes* allows you to use just about any video source to capture images. It's quite easy to connect your video-camera to your computer and capture anything your camera can see. And what about that neat looking picture on your favorite videodisc? Can you digitize that as well? The obvious answer is "Yes, you can!" Although not all colors will come out perfectly (due to the mechanics of the IIGS), you will get a fairly good representation of the image that you are capturing.

## The TouchWindow™

by Edmark

***Simply Point and Touch.***

Get your hands on the most efficient and friendly computing tool around. The TouchWindow is a portable touch screen that attaches easily to your existing monitor. It is especially effective with preschoolers, early learners and developmentally disabled.

Students naturally point to and touch a computer monitor while using today's interactive instructional software. The TouchWindow takes advantage of this natural reaction. With the TouchWindow, students select choices directly on the screen by touching an object or word, and the computer responds. This interaction keeps students more engaged in the learning process.

*Another idea for using the TouchWindow is at your school's open house. Parents won't need to know how to use the mouse to see the stacks created by your students in the classroom.*

Suggested Retail: $275.00

***Special Catalog Price: $249.00***

*TouchWindow* ..... **HW-005**

**Success Story!**

**Special education teacher Tony Latess** and HyperStudio have made a big difference to some little children. With difficulties ranging from autism and Down's Syndrome to speech and language delays, Tony's students can, at times, find it difficult to cope with normal learning activities. Things have changed, however. Tony has created a HyperStudio stack which enables the students to socially interact with each other simply by touching the computer screen. He digitized each of the children's pictures and incorporated them into his stack. With the help of the TouchWindow, the students simply point at and touch their fellow classmates' pictures and hear their names spoken in their teacher's voice. Tony reports that the children have made remarkable advances in their social and learning abilities!

# Multimedia Tools

## The Sauce Card from Harris Labs

Why is it important to have enough memory? Many Apple IIGS programs such as HyperStudio, The Graphics Exchange, Platinum Paint, and others, require your computer to have at least one megabyte (1 MB) of Random Access Memory (also known as "RAM") in order to operate properly. Other programs require even more. If you've ever seen that awful "out of memory" message, you know what we mean.

Adding more memory to your computer is actually very easy. With the GS Sauce Card from Harris Labs, you need only decide how much memory you want and choose from the chart below. If you have any problems deciding what you need, feel free to give us a call at 619-442-0522, Mon. through Fri., 9:30 am to 5:30 pm Pacific Time.

**ROM vs. RAM...**

Every computer, including the IIGS, has two areas of memory. The first, called ROM **(Read Only Memory),** can only be read from, whereas the second, called RAM **(Random Access Memory),** can be read from *and* written to.

ROM is used to keep important information the computer needs to operate. Even when the computer is turned off, that information remains in ROM. On the other hand, RAM is used only when the computer is turned on. A program needs RAM as a place to do its work. The amount of RAM it needs depends on what type of work it's doing.

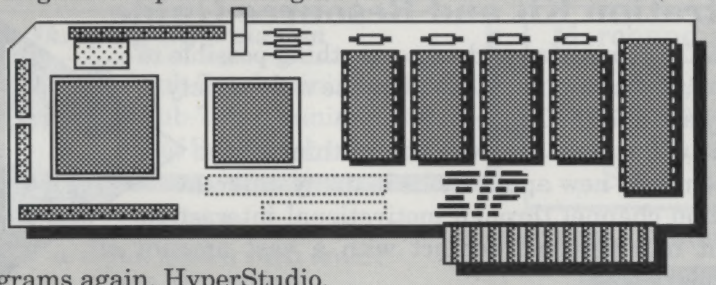
HyperStudio runs very well on a standard 1MB RAM Apple IIGS computer. Much care was taken when HyperStudio was created to ensure that the majority of IIGS users could enjoy working with HyperStudio without any problems with RAM.

**Memory Upgrade Chart**

| Sauce Card w/memory chips | Memory after installation | | Regular Price | **Catalog Price** | Order Number |
|---|---|---|---|---|---|
| | ROM 01 | ROM 03 | | | |
| Sauce Only | n/a | n/a | $149.95 | **$89.95** | HW-006 |
| Sauce w/ 1 MB | 1.25 MB | 2 MB | $249.95 | **$154.95** | HW-007 |
| Sauce w/ 2 MB | 2.25 MB | 3 MB | $349.85 | **$219.95** | HW-008 |
| Sauce w/ 4 MB | 4.25 MB | 5 MB | $549.75 | **$349.95** | HW-009 |

## The ZipGS *from Zip Technologies*

The ZipGS is an accelerator card which can increase the speed of your IIGS from the average 2.8 megahertz up to 7.8 megahertz or faster!



With a ZipGS installed, you will never wait on your favorite programs again. HyperStudio, AppleWorks and your favorite desktop publishing software become faster than ever!

- Very easy to operate
- Compatible with all IIGS hardware
- Compatible with all IIGS software
- Addresses all memory
- Upgradable to 10 Megahertz
- Upgradable to 64K cache memory
- 16 variable speeds
- Fully DMA compatible

*Installation of the ZipGS is easy and takes only a matter of minutes. To help with the installation, an animated pictorial instruction manual (created with HyperStudio!) which gives detailed instructions on installation and operation is included.*

*The ZipGS can be upgraded at any time. Zip Technology has available upgrade kits that boost the speed up to 10 Mhz!*

*The ZipGS has only one custom integrated circuit. The other three components on the ZipGS are the same reliable components found in your Apple IIGS. Plus, the ZipGS requires only 120 ma of power—10 times less than other accelerators. Low power means it will always run cool.*

***Super Speed Up Your IIGS For Less!***

**Back:** "HyperStudio World Tour" followed by a list of toured cities.

## HyperStudio Demonstration Kit and Resource Guide

**Special Offer!**

At Roger Wagner Publishing we're committed to doing everything possible to help you show HyperStudio to others, and communicate to them the wide variety of uses now possible with this software and the Apple IIGS.

HyperStudio is a program that will change the way people think of the Apple IIGS, and give the machine entirely new applications in many different areas. By expanding the information channel through motivational interactive multimedia, students are brought into personal contact with a vast amount of information in a new and revolutionary way.

As a means of bringing *you* into personal contact with today's most advanced software available on the IIGS, HyperStudio, we are offering this special package at a minimum cost. With the *HyperStudio Demonstration and Resource Kit* you can experience first-hand interactive multimedia on the IIGS.

With this special offer, **you will receive ten 3.5" disks packed with samples** of HyperStudio stacks created by teachers in real classroom situations. **You will also receive a special version of HyperStudio** which will allow you to take it for a "test drive" and fully experiment with all of HyperStudio's functions. As if this weren't enough, you receive our resource guide filled with useful information aimed at answering any questions you may have regarding the use of multimedia, *plus... a listing of vendors where you can obtain additional multimedia equipment!*

***Ten disk set & Resource Guide!***

# Multimedia Test Drive Kit

In an offer no one can refuse, Roger Wagner Publishing, Inc. has released a complete multimedia staff development package. This "Workshop in a Box" gives you the opportunity to take a test drive in the new world of hypermedia right in your own school.

The "Multimedia Test Drive Kit" includes **complete copies of the HyperStudio software** and hardware for the Apple IIGS and a **50 page workbook** to conduct a one to two day workshop. Also included are other supporting devices such as a **TouchWindow, hand scanner, laserdisc, and video digitizer**. These materials are loaned **free of charge** to any school that would like to conduct a multimedia workshop for ten or more people.

The tools for the effective use of hypermedia are available right now. The only remaining obstacle is a simple lack of information and experience. We are happy to provide this package as a significant breakthrough in giving teachers an immediate and hands-on way to find out about hypermedia.

For more information on conducting a multimedia workshop or demonstrating today's most exciting technology at your local computer conference, contact Della Smith, Roger Wagner Publishing, Inc., 1050 Pioneer Way, Suite P, El Cajon, CA 92020, (800) 421-6526, (619) 442-0525 (fax).
